Slide # / NOTES:	COPY:
Say slide # before reading each slide. Save it all on one file. 1	Welcome to the Editing and Designs course. This interactive simulation explains how to edit the existing project and add designs to be explored. Click on begin button to start the course.
2	To launch this simulation, you will be going to the projects screen where you can begin and manage your projects.
3	Let us understand the process of editing the existing project in this simulation. From the Project screen, you can start managing your projects. To edit the details of a project, click on a project name or click on Open under actions column.
4	While working on the advisor, you can access and change the project setup details at any moment by clicking the Setup icon in the top left corner of the screen. The simulation icon saves and refreshes the data you are working on in this program.
5	The planning component has already been covered in the preceding module. Please refer to the project module for more information.
6	We have covered the process of editing the project, and now let us look at how to add design details.
